

# NATURAL AND PHYSICAL SYSTEMS – MINI-TEST REVIEW

## TOPIC LIST

### **The History of the Earth**

- How old it is
- How it was formed
- The geological eras

### **Theories Like**

- Continental Drift
- Plate Tectonics

### **The Earth's Processes**

- Mountain building
- Erosion and weathering
- Folding, faulting and volcanoes

### **The Landforms of Canada**

- Their appearance
- Their location
- Their history (when and how were they formed?)
- Unique features of each landform

### **The Rock Cycle**

### **Climate**

- Continental vs. Maritime climates
- Climate graphs
- The causes of precipitation

### **Soil**

- Soil profiles
- The components of soil

### **Vegetation**

- Vegetation regions
- Deciduous vs. coniferous
