

NATURAL AND PHYSICAL SYSTEMS – UNIT TEST - TEST REVIEW

This test will assess your understanding of the most recent, and most important, work on natural and physical systems – Ecozones and the attempts to protect our physical geography through our National Parks system.

Ecozones

- Be expert with at least five of them
- Be familiar with all Ecozones: understand the vegetation, wildlife, urban settlements, and climate
- Be able to comment on the national physical geography landscape of Canada

National Parks

- Be familiar with the National Parks studied and shared in class
- Be knowledgeable on the aims of the Parks system

Also – a sight passage!

Total marks: 25
